

Siddhesh Sawant

ssawant0202@gmail.com | 236.867.1693

I'm a Computer Engineering graduate who values continuous learning and sees challenges as growth opportunities. I enjoy collaborating with others, contributing to impactful projects, and believe in teamwork.

EXPERIENCE

NEW/MODE | QA ANALYST |

New/Mode is a platform that helps organizations run advocacy campaigns to engage supporters and influence decision-makers through email, social media, and calls
Jan 2023 - Nov 2023 | Vancouver, BC

- Tasked with improving the robustness of front-end (Vue) and backend (PHP, SQL MariaDB) through comprehensive QA testing
- Utilized Git Flow for version control and developed creative test cases by analyzing code and testing unconventional interactions
- Identified and reported critical issues, significantly enhancing product quality and stability

ACADEMIC PROJECTS

CLOUDNATIVEJS - NODESERVER | DB SCALING | JAVASCRIPT

- Built a scalable **Express.js** application that possesses infrastructure with the **Docker**, **Helm**, and **Kubernetes**
- Improved the app's functionality by adding health checks, auto-restart of specific app data, and metrics based on use of **OpenTracing** and **Prometheus**.
- Filled in areas of UI with related details ensured by the functionality of elements using **CSS** selectors.

NEXT.JS WEB DEVELOPMENT APP | FULL STACK APPLICATION | JAVASCRIPT

- Developed the front end using **Next.js** and the back end using **Express** and **Node.js**, integrating **PostgreSQL** for data management.
- Implemented security features for authentication and admin control, ensuring robust and secure application functionality.
- Delivered a fully functional web application with real-time data updates and administrative controls, showcasing expertise in full-stack development.

CI/CD PIPELINE SETUP | DEVOPS PROJECT | JENKINS, DOCKER, KUBERNETES

- Set up a **CI/CD** pipeline using **Jenkins** for continuous integration, **Docker** for containerization, and **Kubernetes** for orchestration and deployment
- Automated testing and deployment scripts to reduce manual intervention and minimize errors
- Streamlined the deployment process, significantly reducing deployment time and improving overall team productivity and software quality

EDUCATION

SIMON FRASER UNIVERSITY
BASC IN COMPUTER ENGINEERING
Grad: Aug 2024

SKILLS

PROGRAMMING

- C/C++
- Python
- SQL
- Data Pipeline
- HTML
- Node.js
- React
- CSS
- Git
- Relational Databases
- JavaScript
- Flask

HARDWARE

- Arduino
- Raspberry Pi
- STM 32
- FPGA
- PCB Testing

UNDERGRADUATE COURSES

- OOP & OOAD
- Data Structures
- Algorithms
- Computer Organization
- Embedded Systems
- AI & ML

CERTIFICATIONS

- Data Structures & Algorithms
- Cypress End-To-End testing
- Databases & SQL Querying
