EDUCATION

Bachelor of Computer Engineering, Simon Fraser University

2018 - 2024

Minor in Mathematics

Relevant Coursework: Data Structures and Algorithms, Computer Architecture, and Machine Learning.

SKILLS

Technical Skills	C#, object-oriented design, optimization mathematics, linear programming, Java, Python
Soft Skills	Collaboration, Adaptability, effective communication, problem-solving, abstract thinking
Tools	Relational databases, Cypress, nonlinear optimization, C++, distributed systems, Terraform

EXPERIENCE

Software Development Intern

Jan 2023 - Jan 2024

New/Mode

Vancouver, BC

- Automated **CI/CD workflows** integrated with **Git**, resolving **20% errors pre-deployment** and saving **10+ hours weekly** in debugging time.
- Wrote and maintained **well-tested code** by designing **Unit Tests** in **Cypress**, reducing deployment time from **2 days to 4 hours**, ensuring reliability in an **Agile environment**.
- Utilized **Docker** and **Kubernetes** to streamline containerized application deployment, ensuring scalability and improving operational efficiency.
- Conducted peer **code reviews** to ensure quality, maintainability, and scalability, contributing to team success.

Software Development Intern

Jan 2021 - Jan 2021

Faisal Labs

Vancouver, BC

- Collaborated in an **Agile environment**, actively gathering and refining **user requirements** to ensure alignment with project goals.
- Improved **ML model accuracy by 10%** by performing data segmentation on **CT, MRI, and retina scans**, working closely with data scientists.
- Led a team of 3 to implement **advanced algorithms** based on research papers, achieving a **15% improvement** in model predictions.
- Authored **comprehensive documentation**, ensuring clarity in processes and smooth handoffs to stakeholders.

PROJECTS

Issue Tracker ([Website](#))

Issue Tracker Developed an issue tracker using **Next.js**, **Radix UI**, and **AWS RDS**, achieving an **8% speed improvement** through **dynamic caching**. Integrated **Google Authentication** and secure URL access safeguards, ensuring **data security**. Deployed on **Vercel** to enhance scalability and support distributed teams.

Automated Chessboard ([Video Demo](#))

Led a team of six to develop an **automated chessboard** leveraging **Python** and the **Lichess API** with **OAuth-based login**. Designed and built the system, including **UI** for game initialization and detailed **circuitry** for seamless physical and digital gameplay integration.

LEADERSHIP

- Demonstrated **self-motivation** by completing **Data Structures and Algorithms (DSA)** courses, a **SQL course**, and self-learning **JavaScript** and **React**.
